# The Columbia Broadcast Seed Sower.

A Practical Machine for Sowing Correctly all Varieties of Farm Seeds.

Perfect in Distribution. Mechanically Constructed.

Neatest and Most Simple. Has Automatic Cut Off and Regulator. The Lightest Running of all Seed Sowers.

Strongest in Construction. The Lowest Priced Standard Machine Manufactured.

Each machine packed separately. The many advantages of this seeder should appeal to every shrewd buyer.

PRICE,

\$1.25

#### Luxuriant House Plants

# PRODUCED SUDDO=TODACCO SOAD

The application is simple. Dissolve two ounces of Soap in a gallon of warm or cold water. For plants, apply the liquid when cold, using garden syringe, atomizer, a common sprinkler, or the plant may be gently sponged. Care must be taken that the liquid reaches insects underneath the leaves. One or two thorough applications will generally rid plants of the pest for the entire season. For animals, use the solution, or make a good lather and apply with hand or a sponge.

#### THE COST IS TRIFLING

10 Cents. -3 oz. Cake makes  $1\frac{1}{2}$  gallons prepared solution. Mailed, postpaid for 13 cents.

### Special Offer ....

On receipt of the sums named we will send you any five cent packets in this catalogue to wit:

3	pkts.	for	. \$	.10
0	pkts.	for		.15
10	pkts.	for		25

We desire to introduce our seeds more extensively, hence this offer. The packets will be our regular 5 cts. pkts.

#### Premium on Flower and Vegetable Seeds in Packages.

The wide distribution of our Seeds being a special object, we offer the following inducements to parties forming Clubs, or to those who desire to purchase packets in any quantity. These rates apply to Vegetable and Flower Seeds only when ordered in packets, purchaser's selections, cash to accompany order. Seeds ordered in this way will be sent post-paid to ony address. Please note that NO COLLECTIONS or seeds by WEIGHT ar MEASURE are included in this offer.

Send	\$1.00	and selec	t P	acke	ts to a	amoun	t of	\$1.40
Send	\$2.00		66	-1	66 1			\$2.80

Send	\$6.00		"		"			\$8.40

#### THIS OFFER Does Not Include SEEDS by WEIGHT or by MEASURE.

Do not fail to read this Catalogue thoroughly, before you decide what to plant and where to purchase your seeds.

We are sure you will make no mistake to give us a *trial* order, if you have never tried our seeds.

#### To the Public ....

We take pleasure in handing you our Catalogue for the year 1907, which we trust you will read carefully, and select a good line of seeds from it for trial, if you never have tried them.

A good garden depends as much upon the condition of the soil and a good gardener, as upon the seeds sown.

We take the best care and pains in selecting and putting up our seeds, and know that they are all right for our New England climate. Do not fail to try them.

Seeds are not warranted but with proper treatment and care will thrive.

We ship by mail, express or freight as desired. If by mail add eight cents per pound for postage. All goods are delivered to express companies or railroad without charge for cartage. Packets mailed free on receipt of Catalogue price.

Boxes, bags and barrels charged at cost.

Send money by Post Office Money Order, Express Money Order, Personal Checks on Banks in New England, or Certified Cashier's Bank Draft or registered letter.

If your order is not received in a reasonable time, write us and send duplicate order and say how you sent the money.

Order will be filled in order and promptly.

Write your *Name* and *Address* plainly so that no mistake can be made.

Yours Truly,

SETH WYMAN FIFE, PROPRIETOR OF

E. W. BURBANK SEED CO.,

FRYEBURG, ME.

# GARDEN Vegetable Seeds.

#### Beans-Dwarf or Bush.

Plant as early in the spring as the season will admit on account of frost. Beans are very tender and are killed by frost. Plant in drills about two inches deep, and from eighteen inches to two feet apart. If the soil is not rich, use good fine manure in the drills, with a liberal quantity of superposphate. If you want them at all seasons make a succession of sowing from

May to July.

One quart beans for one hundred feet of drill.

#### String Beans.

	Pkt.	Qt.	Pk.	Bu.
Valentine, Hopkin's Improved. Early, productive ten-				
der, succulent and of excellent flavor. A good				
bean for the first crop,	\$ .10	\$ .20	\$1.25	\$4.50
Dwarf Black Wax. One of the best varieties; the				
pods when ripe are a waxy yellow, very tender and				
rich when cooked. Very popular,	.10	.20	1.50	6.00
Wardwell's Kidney Wax. Extra early, purely wax				
pods, long, flat and remarkably free from rust and				
are of the best in cultivation, very prolific,	.10	.20	1.50	6.00
Davis Kidney Wax. The best white-seeded wax bean				
extant,	.10	.20	1.50	6.00
Improved Golden Wax. One of the best strains of				
Golden Wax. Hardy, prolific, of best quality: pods				
long, straight, thick, and vines very erect,	.10	.25	1.50	6.00
Low's Champion. Early, hardy, thrifty and enormos-				
ly productive; it also combines extreme tenderness				
and delicious flavor, and being absolutely without				
strings to the pods it excels every other variety as a				
snap or string bean. As a shell bean it has but few e-				
quals and is of splendid flavor when cooked,	.10	.20	1.25	5.00
Early Long Yellow Six Weeks. Hardy and prolific,	.10	.20	1.25	4.50
Horticultural Dwarf. Large and productive: pods				
showy; great favorite in New England, and fine				
shell variety,	.10	.20	1.25	4.50
Curries Rust Proof Wax. For earliness, productive-				
ness, freedom from blight or rust, and all around				
good points, it justly belongs at the head of the list				
of the wax varieties. Pods long, flat, tender and				
fine quality,	.10	.25	1.75	6.00
Henderson's Bush Lima. This is a bush variety of				
the small Lima, a very rich, luscious, Bean, that				
has the advantage of not requiring poles to run on				
while it comes earlier into bearing. The Bush		3		
Limas are now very popular,	.10	.25	1.75	6.00
Dwarf Lima Wax. A new Lima introduced by the				
Cleveland Seed Co. to the trade, and new to the				
public for the first time. A very fine bean and				

			_	
very desirable in the garden,	.10	.25	1.75	6.00
Burpee's Eush Lima. The greatest novelty ever				
known in beans. The first and only Large Lima				
Bush Beans. Every garden should have them,	.10	.30	1.75	6.00
The Goddard or Boston Favorite. Particularly val-				
uable as a shell bean, being very large, handsome,				
and of a delicious flavor, either green or dry. It				
is very productive,	.10	.15	1.25	4.50
Dreer's Improved Lima. An improvement on the				
Large Lima; very productive and of superior qual-				
ity,	.10	.25	2.00	
Red Kidney. A standard field sort,	.10	.15	1.25	4.00
Stringless Green Pod. Entirely free from strings,				
and one of very fine quality,	.10	.30	2.00	

#### Beans-Pole or Running.

These are more tender, and require richer ground and more care in culture than the bush beans; they succeed best in sandy-loam. Plant in hills three feet apart and three and one-half feet between rows, use a shovelful of old fine manure in the hill. Plant from six to eight beans in a hill.

One ounce will plant one hundred and fifty hills: ten to twelve quarts to the acre.

the dere.				
	Pkt.	Qt.	Pk.	Bu.
Horticultural or Speckled Cranberry. A good vari-				
ety for private use, a good snap or shell bean,	\$ .10 \$	.20	\$1.25	\$4.50
Indian Chief or Black Wax Bean. One of the best				
varieties; either for a snap or shell; remarkable for				
its fine, tender and rich colored pods. Very pro-				
ductive,	.10	.20	1.25	4.50
Kentucky Wonder. Excellent green podded snap				
bean, very productive,	.10	.20	1.25	5.00
Mammoth Carmin Podded. Most desirable Horticul-				
tural bean for color, quantity and productiveness,	.10	.25	1.50	5.00
White Dutch or Case Knife. Used either as a snap				
sort when very young, shelled as the Lima when				
more largly developed, or for soaking when dry,	.10	.20	1.25	4.25
Red Cranberry. Standard sort,	.10	.20	1.30	5.00

#### Beets.

The soil for beets should be very rich, a light sandy loam made rich is the best. Sow as early in the spring as the ground is fit to work, frost does not hurt beets. For late sowing soak the seed in warm water twenty-four hours, sow in drills fourteen inches apart; the first weeding thin out to four or five inches apart. Pull in the fall before they get a hard frost on them. Store for winter use in barrels with five or six inches of sand on top in a cool cellar just above the freezing point,

If sent by mail in quantity of one-half and upwards, add eight cents per pound for postage.

One ounce to fifty feet of drill; six pounds to the acre.

	Pkt.	Oz.	<u>₁</u> lb.	Lb.
Dirigo. It originated with a leading market garden				
er, and was brought to perfection after years o				
careful cultivation. It is a rich, blood-red beet of fine grain and flavor, is earlier than the Egyptian				
or Eclipse, of smooth and rapid growth; top and ta				
roots being very small,		.15	.20	.75
The very best for Early Market.				
Egyptian Blood Turnip. Very early and of rapid				
growth. A good beet for early market,		.10	.20	.60
Crosby's Egyptian. As early as the original type bu			0.5	
thicker, smoother and of better quality,		.15	.35	.75
<b>Early Blood Turnip.</b> An old standard table beet flesh dark blood red, fine grained and very tender,	,	10	.20	.60
Edmand's Early Blood Turnip. This fine new varie		.10	.20	.00
ty grows but very small tops, the short foliage be				
ing of a rich bronzy red. The beets are of a hand				
some round shape and very smooth, the skin being	g			
of a deep blood red color; the flesh is also a very	•			
dark red, and remarkably sweet and tender. On		4.0		
of the finest table beets grown,		.10	.20	.60
Dewing's Blood Turnip. A large deep red beet o		.10	90	GO.
good quality; a good market beet,	00	.10	.20	.60

Lentz Extra Early Turnip. A large, small-top round beet; fine strain,	.05	.10	.25	.75
swiss charp, Silver or Sea Kale. Grown exclusively for its leaves, the middle of the leaf can be				
used and served like Asparagus, the rest of the leaf like Spinach. Pick the leaves and others come out	0.5	10	25	0.0
from the stock. Excellent greens,	.05	.10	.25	.80

#### Mangel-Wurzels.

	$\frac{1}{4}$ lb.	Lb.
Mammoth Long Red. An improved form of the old Long Red,		
growing to nearly double the size. Will keep in any ordinary		
cellar until spring without losing its crispness. One of the		
best Mangels for general crops,	.10	.25
Golden Tankard. Flesh bright golden yellow, used extensively		
in English dairies for its nutricious and milk producing quali-		
ties. Sheep eat it in preference to all other mangels. With		
extra cultivation yields 75 tons per acre,	.10	.25

#### Brussels Sprouts.

Produces along the whole length of the stem a number of small sprouts resembling miniature cabbage of one or two inches in diameter of excellent flavor. The seed should be sown about the middle of May, in a seed-bed and the plants afterwards set in rows two feet or more apart, and cultivated like cabbage. This vegetable does not require extremely high cultivation, however. It is ready for use in late autumn, after the early frosts. One ounce of seed produces about fifteen hundred plants.

	. P	kt.	OZ.	⅓lb.	Lb.
Dwarf Imperial Paris.					
The finest variety,		.05	.15	.50	2.00

#### Cabbage.

The cabbage is one of the most largely grown vegetables in cultivation. Plant in newly broken ground well manured broadcast. Use a shovelful of superphosphate. Plant in hills two and one half by three feet for the large kinds, and one and one half by two feet for the smaller kinds. The crop is much improved by frequent hoeing.

	Pkt.	Oz.	₫lb.	Lb.
Early Jersey Wakefield. An early standard cabbage in the large markets,		\$ .25	\$ .60	\$2.00
Henderson's Early Summer. It is the earliest of all the large cabbages; heads of a large size and very solid,		.25	.60	2.00
Hollander or Danish Ball Head. An unsurpassed variety, heads round, large, very hard and fine flavored,		.25	.60	2.00
All Seasons. This fine variety is large, solid and sure to head. One of the best cabbages either for early or late crops as it comes to a head earlier and keeps well during the winter,		.20	.60	1.75
Early Winningstadt. Heads large, cone-shaped and very solid; sure to head; a good kind to plant in light soil,		.20	.60	1.75
Fottler's Improved Brunswick. One of the best drumhead cabbages in cultivation, sure to head, grows to a large size and very solid,		.20	.50	1.75
Improved American Savoy Drumhead. Very sweet and tender; good sized, firm heads; a good cabbage for family use,		.20	.65	2.00
Stone Mason Drumhead. Standard variety. Large solid, tender, and an excellent winter cabbage,		.20	.50	2.00
World Beater. A new cabbage, as large or larger				

than Marblehead Mammoth, yet uniform in size and true to type, and very solid header,	.05	.20	.70	2.25
Surehead Cabbage. Produces large, round flattened heads of Flat Dutch type, and is remarkable for its certainty of head. It is all head and sure to head even under unfavorable conditions. The heads are remarkably uniform, very hard, firm, and fine in texture, and ordinarily weigh from ten to fifteen pounds each. It is very sweet flavored, has but a few loose leaves, keeps well, is good for shipping, and is just the variety and quality to suit market gardeners, farmers, and all lovers of good winter cabbage.	.05	.20	.75	2.50
Mammoth Rock Red. This fine new cabbage originated with a grower for the New York market. It is the largest Red cabbage known; of a deep red color inside as well as outside, while they are almost literally as a hard and as kild are a real.	0.5		. 57	
erally as hard and solid as a rock,	.05	.20	. 10	5.50

#### Carrots.

The Carrot wants rich, sandy loam, deeply tilled. Sow quite early in spring in drills 14 inches apart, and keep as free from weeds as possible. If for table use, thin out to three or four inches n the row. If grown for stock they do not require to be thinned out.

One ounce to one hundred feet of drill; three to four pounds to the acre.

	Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Improved Long Orange. An improvement on the				
Long Orange; decidedly superior to any other sort				
of Orange Carrot being larger, better flavored, and				
safer to produce a good crop,	.05	.10	.25	.75

Danver's 1-2 Long. A new variety; grows shorter than Long Orange; much easier to pull and grows

very handsome,	.05	10.	.25	.75
Oxheart. Very thick and short, fine grained and				
sweet,	.05	.10	.30	.80

#### Cauliflower.

Any soil that will grow early cabbage will grow Cauliflower, as their requirements are almost alike. The seed may be sown in hot-bed in March or April, and transplanted about the first of May.

One ounce of seed, will produce 3000 plants.

	Pkt.	Oz.
Henderson's Early Snowball. One of the early sorts,	\$ .15	\$2.00
Early Favorite. This is a new variety in this country		
and is we think, the best early large growing kind.		
Try it,	.10	1.50

#### Celery.

Sow early in hot-bed or in boxes in a warm room. When plants are two inches high transplant into open ground four inches apart. When six or eight inches high, transplant again into trenches four feet apart and eight inches apart in row. Dig the trenches ten inches deep, fill in six inches of old fine manure and mix thoroughly with the soil in bottom of trench. Earth up to blanch three or four times during their growth; no earth should be thrown into the center of the plants. Water freely.

One ounce of seed, produces some 4000 plants.

	Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Boston Market. It is large and a vigorous grower,				
blanches easily, pure white, solid, crisp, tender,				
and excellent in all other respects,	.05	.20	.60	2.25
Henderson's White Plume. Crisp and possessing a				
sweet nutty flavor; a valuable sort for family use,	.05	.20	.60	2.25
	2 oz.	$\frac{1}{2}$ lb.	Lb.	
Soup Celery. Seeds for flavoring soups, pickles, etc.,	.05	.25	.40	

#### Chervil.

A plant resembling Parsley. Grown for salads or for garnishing. Seed should be sown in succession, in shallow drills.

		Pkt.	Oz.	$\frac{1}{4}$ lb. I	⊿b.
Curled.	Beautiful foliage, used for garnishing,	.05	.15	.40 \$1	.00

#### Cress or Peppergrass.

Used as a salad in connection with Lettuce. The leaves are frilled and curled on the borders, of a dark green color and has a warm pungent taste. sow early in spring in drills ten inches apart in good rich soil and cover lightly.

#### Corn---Sweet.

	Pkt.	Qt.	Pk.	Bu,
Early White Cory. An early dwarf variety, good for first crop in the kitchen garden,	.10	.25	\$1.50	\$4.00
Crosby's Early. An excellent variety, a great favor-				
ite in the market in all the large cities, largely	10	~~~	1 05	4 00
grown in Maine for canning,	.10	.20	1.25	4.00
Burbank's Early Maine. The earliest and best Sweet				
Corn in cultivation. Has a pure white cob with a				
rich, cream white kernel, sweet and juicy. Looks				
nice on the table; has no objectionable look like the	_			
Cory and Marblehead corn with a red kernel and			•	
cob. Ears grow to be a good size, uniform in				
shape,	.10	.20	1.25	4.00
Stowell's Evergreen. A late variety of excellent				
quality remaining longer in the green state than				
any other kind,	.10	.20	1.00	3.50

Black Mexican. Grain bluish black, but is especially rich in sugar qualities,	.10	.20	1.25	4.00
best main-crop varieties; very tender quality,	.10	.20	1.25	4:00
Country Gentleman. A medium late variety, having irregular rows. Has a very small cob and deep kernel, is tender and sweet; very desirable for the				
home garden,	.10	.20	1.25	4.50
very sweet,	.10	.25	1.25	4.50
Rice's Dwarf Yellow.	.10	.30		
Canada Field Corn. The best yellow field Corn for this part of New England. Eight rowed, and good length of ears, and nearly all have two ears to the stock; a very small cob, and yields a large number of bushels per acre of shelled corn. Will mature in about 75 days.			1.25	4.00
CORN-SWEET FODDER.				
Sanford's White Flint. White Cap Yellow Dent. Leaming.	·		.50 .50 .50	1.50
POP CORN.				
Rice. Yellow color and a good producer and popper,			Ear.	

#### Cucumber.

Plant as soon in spring as danger of frost is over, and the ground warm and mellow, in hills five feet apart each way, and cover one-half inch deep. Thin to four of the strongest plants in a hill.

Lb.

One ounce to fifty hills.

Early Russian. The earliest variety in cultivation. .05 .20 .65

Arlington White Spine. This variety of cucumber is one of the finest we have seen, being remarkable

E. W. BONDANK SEED COS CATALOG	UE.			10
for evenness of size, fine form and dark green color		.10	.25	
Chicago Pickling. Good size, and a good pickler,  White Wonder. This variety surpasses the famous white Pearl in quality and productiveness, and is hardier; fruit is ivory white from time of forming	.05	.10	.25	
until_fully ripened,	.05	.20	.50	
<b>Boston Pickling.</b> An early table variety, producing its fruit in clusters near the root of the plant. Skin				
green, prickly; flesh white, tender and well flavored,	.05	.10	.25	.75
Early White Spine. One of the best table sorts, and popular with market men on account of its color which is light green, turning white instead of yellow when ripe. It is of uniform shape, medium size,				
tender, crisp and well flavored. Good for forcing,	.05	.10	.25	.75
Improved Long Green. About one foot long, tapering at the ends. Very dark green in color. Flesh crisp and of good flavor, and less seedy than many				
other sorts. One of the best kinds for pickling,	.05	.10	.25	.75
Early Green Cluster. An early table variety, producing its fruit in clusters near the root of the plant. Very productive, and in earliness next to Russian. Skin green, prickly; flesh white, tender	0.5	15	<b>~</b> 0	4 40
and well flavored,	.05	.15	.50	1.50
Everbearing. Small size, very early and very pro-	.10	.40

#### Endive.

One ounce to 100 feet of drill.

.10

 $.50 \quad 1.75 \quad 5.50$ 

For early use, sow in May, scattering the seed thinly, in drills ten inches apart, covering it lightly, and for succession every two or three weeks until mid-summer. The plants must be blanched before using, which is accomp-

#### Kale.

Sow early in the spring in prepared beds, covering the seed thinly and evenly: transplanted in June, and treat in the same manner as for cabbage. They are extremely hardy, and will endure quite a low temperature. One ounce will sow 150 feet of drill.

#### Leek.

The Leek is generally considered superior to the onion for soups: it is very hardy and easily cultivated. Sow in drills a foot apart in April, and transplant in July in rows fifteen inches apart and six inches from plant to plant. They should be set five inches deep in rich, moist soil.

One ounce will produce about 1,000 plants. Pkt. Oz. Lb.

London Flag. Hardy, useful sort for general use. .05 .25 \$2.00

#### Lettuce.

In the Northern States, sow in seed bed as early in spring as the ground can be worked, and at intervals thereafter. When plants have made two or three leaves, transplant into rows fifteen inches apart and one foot apart in the rows. For early forcing, sow in hot bed from commencement to the middle of winter.

One ounce to 120 feet of drill.	Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
*Tennis Ball. The best Lettuce in cultivation for				
family use. Early, extremely tender and crisp,				
and remains in head a long time before running to				
seed,	.05	.15	.35	\$1.00

*Boston Market. An improved variety of quick growth, one of the best for forcing,	.05	.15	.35	1.00
Boston Curled. A variety of great beauty and of very superior quality. The fine elegant frills of the leaves render it highly ornamental, *Hanson. Heads very large, solid, tender and crisp,	.05	.15	.35	1.00
of fine flavor,	.05	.15	.35	1.00
*The Deacon. A splendid Cabbage Lettuce: very large, crisp, tender and of fine quality: it stands the				
heat of summer well,	.05	.15	.35	1.00
<b>Prize Head.</b> Leaves green and red, very thin, crisp, and tender. One of the very best for private use,	05	.15	35	1.00
Salamander. Fine, compact heads, which resist summer heat admirably; very popular, and heads large	. 0 0	• 10	.00	1.00
and well bleached,	.05	.15	.35	1.00
*Big Boston. A fine strain for forcing; very large, heads solid,	05	.15	35	1.00
*Black-seeded Simpson. A superior variety; large		.10	.00	1.00
and compact heads,	.05	.15	.35	1.00

\* Indicates Cabbage or Head Lettuce.

Plant as soon in spring as danger of frost is over and ground warm and mellow, in hills five feet apart each way. Place ten or fifteen seeds in a hill, and cover one-half inch deep. When danger of bugs and worms is past thin to four of the strongest plants in a hill. A shovelful of rotted manure should be put in the bottom of each hill.

Muskmelon.

should be put in the bottom of each inn.				
One ounce for 60 hills.	Pkt.	Oz.	₫lb.	Lb.
Christiana. Fair size; netted; orange color, very				
delicate flavor,	.05	.10	.25	.80
Long Yellow. An early variety; one of the best	;			
where the season is short,	.05	.10	.25	.80
Vick's Prolific Nutmeg. Fruit medium to small;				
shallow ribbed and thickly netted; very early and				
productive; flesh green, rich and juicy;	.05	.10	.25	.80
Nutmeg. Very early, not large but very sweet and				
juicy, fine for early garden,	.05	.10	.25	.85
Early Jennie Lind. A popular, small, early variety,				
flattened at eace end; ribbed and closely netted;				
flesh light green, and generally of fine flavor,	.05	.10	.25	.85

#### Watermelon.

Plant as soon in spring as danger of frost is over, and ground warm and mellow, in hills six feet apart each way, and cover one-half inch deep. Thin to three of the strongest plants in a hill. A shovelful of rotted manure should be put in the bottom of each hill.

One ounce for thirty hills.

	Pkt.	$\bigcirc_{Z}$ .	1lb	Lb.
Phinney's Early. A large oval variety; skin striped				
and marbled with different shades of green; rind				
thin; flesh fine scarlet and quite solid to the center.				
Hardy, productive and of good quality,	.05	.10	.25	.75
Mountain Sweet. A long striped variety, red flesh				
crisp and sweet; hardy, productive and of good				
quality,	.05	.10	.25	.75
Vick's Early. A fine early melon; grows to a good				
size, flesh bright red and very sweet,	.05	.10	.25	.75
Citron. A round, handsome fruit, of small size; used				
in making sweet meats and preserves,	.05	.10	.25	.75

#### Mustard.

A pungent salad used with Cress. The seed is used for flavoring pickles. Sow in rows ten inches apart the first of May; cut when 2 or 3 inches high. One ounce to forty feet of drill.

	Pkt.	∄lb.	Lb.
Brown or Black Seeded. The best for all uses,	\$ .05 8	\$ .10	\$ .25
White London. Considered the best for Salads and Spin-			
ach; leaves light green, is best when about four inches			
high,	.05	.10	.30

#### Onion.

One of the most extensively grown vegetables in cultivation. The soil for onions should be very rich, the ground should be highly manured in the fall. No manure should be used in the spring as it tends to make the onions grow a big stiff neck. They do best sown on the same ground

year after year. Sow in drills 14 inches apart, as early in spring as the ground can be worked, use at the rate of five pounds to the acre.

One ounce to one hundred feet of drill.

	Pkt.	Oz.	<u></u> 11b.	Lb.
Danver's Yellow Globe. An early, very productive sort of globular form, mild flavor and is an excellent keeper. Very early, popular, being extensively cultivated,	.05	.25	.75	2.50
Early Red Globe. Skin deep purplish red, form round flat; flesh moderately fine grained and strong flavored. Very productive. The best keeper, and the standard sort for shipping purposes,	.05	.25	.75	2.50
Large Red Wethersfield. Deep-red color, immense yielder and excellent keeper,	05.	.25	.75	2.50
Extra Early Red. Flat in shape and fully two weeks earlier than the Wethersfield,	.10	:30	.75	2.50
Prize Taker. A very large yellow globe onion, very handsome, fine flavor, and grand sort for market. Immensely productive, producing 700 bushels to the acre, and is claimed by the introducer to be the largest, handsomest, finest flavored, yellow globe onion ever introduced. It is a good keeper, remaining hard and firm until spring,	.10	.35	.75	2.50
New White Barletta. The earliest and one of the handsomest and smallest onions grown; one of the best for pickling and also valuable for early				
bunching,	.10	.35	.75	2.50

#### Top or Bottom Onions.

Add ten cents per quart if sent by mail.

	Qt.	Pk.	Bu.
Yellow Danver's Sets.	.15	\$1.25	\$4.00
Red Wethersfield Sets,	15.	1.50	<b>5.</b> 00.

#### Parsnips.

Sow as early in the spring as the weather will admit, in drills fifteen inches apart, covering half an inch deep. When well up, thin out to five or six inches apart in the rows. Unlike carrots they are improved by frosts, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground until spring, to be dug up as required.

One ounce to 200 feet of drill, five pounds to the acre.

If sent by mail in quantities of one quarter of a pound and upwards, add eight cents per pound for postage.

	Pkt.	Oz.	∄lb.	Lb.
Abbott's Improved Long Smooth. Best for general			_	
use,				
Hollow Crown. The standard variety,	.05	.10	.20	.50

#### Peas.

Peas for an early crop should be sown as soon as the ground is in working condition.

The soil for their reception should be light, dry and well sheltered. Mild manure, such as leaf mould, has a beneficial effect; but for many of the varieties, the soil cannot be too rich. For general crops the ground should be well manured the previous year, which causes them to yield more abundantly.

When grown as a market crop, peas are never staked, and are sown in single rows, two or three inches deep and from two to three feet apart, according to the variety or strength of the soil. When grown in small quantities for private use they are generally sown in double rows, six inches apart, and the tall varieties staked up by brush.

One quart to 75 feet of drill; two to three bushels to the acre.

Peas ordered by mail are subject to an extra charge of fifteen cents per quart for postage.

Pints furnished at quart rates.

#### Extra-Early.

_				
$*Indicates\ the\ Wrinkled\ Sorts.$	Dl 4	0.4	T) l	T)
Cleveland's Alaska. The earliest Pea known, being very uniform in growth and ripening two days earlier than Rural New Yorker, and 90 per cent. of the pods can be gathered at the first picking. The dark green color of the pods makes it extremely desirable, as it can be carried a long distance without losing color, which quality, combined with its earliness and uniformity of ripening, makes it the most desirable extra early pea for market gardeners ever offered. Seed round, green, resembling			Pk.	
Kentish Invicta; height two feet,	.10	.15	1.25	4.50
Cleveland's Eclipse. This has been named the "Eclipse" for the simple reason that it eclipses the well known American Wonder, Alaska, Rural New Yorker, or any other known pea on record in point of earliness. Vine two feet high and vigorous. Seed green, wrinkled, smaller than American Wonder in shape and size. Owing to earliness, productiveness, size, quality, and height of vine, this is destined to be the coming canning Pea of America, as well as the truck and kitchen garden. Don't	.10	.15	1.25	5.00
fail to try it.  Improved Daniel O'Rouke. A favorite early variety,	.10	.25	1.50	6.00
*Bliss American Wonder. One of the earliest wrink-led sort; grown about 9 inches high, and is covered with well filled pods, often containing 7 or 8 ten-	.10	.20	1.25	4.50
*Nott's Excelsior. Robust and vigorous in growth, inclined to throw out laterals from the base of the stock, producing in profusion long handsome pods closely packed with large peas of excellent flavor. An improvement on American Wonder, being more	.10	.25	1.75	6.50

vigorous and prolific with large pods with more peas than either the "Wonder" or "Premium Gem"	10	or.	1 55	C 50
A decided acquisition. Height 15 inches,	.10	. 25	1.75	6.50
*McLean's Little Gem. A very dwarf and green				
wrinkled variety. When in a green state it is very				
large and of delicious flavor, being full of rich				
sacharine matter. It is one of the earliest varie-				
ties, bears well, grows about one foot high, requir-				
ing no sticks,	.10	.25	1.50	5.00
Premium Gem. An improvement on the Little Gem,	.10	.30	1.75	6.00

### Second Early.

Heroine. A medium early, green wrinkled pea of recent introduction, pods large, long, slightly curved, containing eight or nine peas of fine quali-				
ty, possessing a rich, buttery, marrow-like flavor,				
An extremely heavy cropper. Two and one-half				
feet high,	.10	.25	1.50	5.00
*Horsford's Market Garden. A grand, new, early		•=		0.00
wrinkled variety, which grows about two feet high				
very stocky and requires no bushing. It is of a re-				
markably fine quality and exceedingly productive,				
having yielded at the rate of over fifty bushels per				
acre. The seeds can be planted from three to six				
inches apart in the drill,	.10	.25	1.50	5.00
Melting Sugar. An edible podded variety, growing				
from 2 to 3 feet high; pods very large, 4 to 5 inches				
long, and one or more broad, each usually contain-				
ing from five to eight large peas. Being edible pod-				
ded, it should be used the same way as a wax bean;				
Very sweet,	.10	.20	1.00	4.00
Gradus or Prosperity Pea, yields an abundant supply of				
the most delicious, large, wrinkled peas much earli-				
er than any other large wrinkled variety, and only				
three or four days after the small round extra				
earlies. It is the earliest large podded pea in culti-				
vation, while the peas are most superior quality,				
both in size and delicious flavor.	.10	.30	2.00	7.00
Thomas Laxton. A new early wrinkled variety of great				

merit. The vine grows about three feet high, much like that of the Gradus or Prosperity, but more hardy and greatly more productive. Pods large, long, with square ends, similar to but larger, longer and handsomer than those of the Champion of England, and fully as uniformly well filled. The green peas are very large, fine colored, and unsurpassed in splendid quality. We are certain that this pea needs only to be known to become one of the most popular sorts for the market-gardener, and home garden. It certainly is one of the very best Early Peas ever produced.

.10 .30 2.00 7.00

#### For General Crops.

*Champion of England. One of the best and most				
popular peas in cultivation; five feet,	.10	.20	1.00	3.50
Royal Dwarf White Marrowfat. A favorite variety				
for canning and field cultivation; three feet,	.10	.15	.75	2.75
Black-eyed Marrowfat. This as well as the preced-				
ing is extensively grown as a field pea, hardy and				
productive; four feet. (Hand picked),	.10	.15	.75	2.75
*Dwarf Champion. This pea gives universal satisfac-				
tion everywhere; very productive, large peas, fine				
flavor, pods good size and well filled with peas,	.10	.25	1.50	5.50
Bliss Everbearing. The vines attain a height of				
from eighteen inches to two feet; foliage large.				
These peas are very large, being half an inch and				
over in diameter, and in quality unsurpassed. For				
a continuance of bearing this variety is unexcelled				
if equalled, a characteristic which gives it especial				
value for late summer and autumn use,	.10	.20	1.25	4.00
Improved Stratagem. Heavy cropper of delicious				
flavor, large handsome pods well filled, two feet,	.10	.25	1.50	5.50
Telephones. A wrinkled variety of superior quality,				
the foliage is luxuriant and of light green color,				
bearing in great abundance, large, handsome pods				
from five to seven inches in length; three feet,	.10	.20	1.50	5.00
Yorkshire Hero. A grand wrinkled variety of branch-				
ing habits and fine flavor,	.10	.25	1.50	5.00
Paragon. Height three feet, double podded; medi-				

um late, long, straight pods; six to nine peas. Stubbed, stalky vine with luxuriant foliage; pods light green. Quality superb, not excelled by any pea, and the largest producer known,..... .25 1.50 5.25 .10 Sharp's Queen. One of the most desirable of the late varieties that have been recently introduced. vigorous branching habit it needs to be sown thinly. Pods long, slightly curved and well filled with large peas of most delicious flavor. Its beauty, productiveness and fine quality combined makes it exceedingly popular. Height two and one-half .30 - 1.50.50 Canada Field. 1.75

#### Parsley.

Parsley requires rich, mellow soil, sow thinly in drills, one or two feet apart and one-half inch deep. As the seed germinates slowly, it is best to soak it for a few hours in tepid water before sowing. For winter use, protect in a glass frame or light cellar.

One ounce to 150	feet of drill.	Pkt.	Oz.	ålb.	Lb.
Extra or Double	Curled.	.05	.10	\$ .25	\$ .75
Fern Leaved.		.05	.10	.25	.75

#### Pepper.

The pepper is a tender annual, and should not be sown or planted out of doors until settled warm weather. Sow seed in hot-bed in March or April thinly, in drills four or five inches apart, and when three inches high, transplant in rows eighteen inches apart, and ten inches apart in the rows. For late crops, sow seed in the garden as soon as danger from frost is over.

One ounce will produce 2,000 plants.

	Pkt.	Oz.	∄lb.
Bell or Bull Nose. This is a very productive sort. The			
flesh is thick, mild and pleasant to the taste. It is a			
good sort for family use,	.05	.25	.75
Squash or Tomato Shape. The sort most generally			
grown for pickling; very productive, the leading mar-			
ket variety,	.05	.25	.75

#### Potato.

	Pk.	Bu.	Bbl.
Early Oxford. This potato resembles the Early Rose			
in shape, it is of a lighter rose color; grows uniform	•		
and smooth in shape, eyes not sunken; having been			
tried with other leading early varieties side by side,			
it gave a better yield of large, smooth potatoes with			
less small ones than the other leading varieties. As			
to quality it is unequalled by any other early pota-			
to. It grows a large, dark green leaf with a stout			
healthy stock which all potato growers know as in-			
dication of a good yielding potato,	.25	\$1.25	\$4.00
Beauty of Hebron. A standard very early sort; oblong			
of fine table size, with shallow eyes; splendid form;			
flesh white, dry and of finest quality,	.25	1.50	4.00
Early Rose. The pioneer of all improved varieties,			
and still highly esteemed,	.25	1.50	4.00
New Queen. A very early variety of excellent quali-			
ty; pure white, produces a very few small tubers,	.25	1.50	4.00
Early Albino. Is a new variety of great promise; first			
catalogued 1887. Wherever it has been tested it			

has done extra well; and it seems from the report

received, to be the earliest and best variety now on	Pk.	Bu.	Bbl.
the market. Everyone should get a few and try			
them, as they seem to be the coming early potato,	.30	1.50	4.00
Burbank's Seedling. This medium early white, intro-			
duced in 1876, has acquired a national reputation.			
Long, smooth, handsome, standard field variety,	.25	1.25	3.50

SACO VALLEY. This new potato was originated by E. W. BURBANK, of FRYEBURG, MAINE, and is named from the Valley of the Saco, in which Fryeburg is situated. This fertile valley is one of the best potato growing sections in Maine, and annually produces enormous crops.

The seed ball from which this potato was originated, was taken from the "Burbank Seedling" and is a cross between the "Burbank" and the "Beauty of Hebron," and is the seventh year from the seed ball.

While it resembles the "BURBANK" in shape, and is an enormous yielder, outyielding the "BURBANK" by nearly one-third, when planted side by side with it, yet it has the fine qualities of the "Hebron," being white, floury, and an excellent table variety.

It is a medium late variety, tops grow stout and stocky, and on good soil quickly covers the ground. \$ .50 \$1.50 \$4.00

The Early Fortune. Is one of the strongest growers among early varieties of potatoes. It has made such unusual developments, both as to early ripening qualities, enormously productive and strong vigorous growth, that no praise is too strong for its merits. It is handsome in form, and color resembles the Early Rose. If you have

not already planted Early Fortune you should do so this			
year without fail,	.50	2.00	.5.00
Peach Blow. This variety has been highly recommended			
for several years, and in some sections has become a			
standard variety for extra early market. It is of the			
rose family, and a good yielder of large smooth tubers			
and the quality is one of the best,	.50	1.50	4.00
Green Mountain. This wonderful late potato originated in Vermont. Its handsome form, white skin and large size recommend it everywhere. The flesh is white and fine grained, cooks dry and is of superior flavor. This is the case when first dug and they retain their good cooking qualities and keep sound and perfect until the new crop comes again. As a variety to keep for spring use, it has no superior. Vines grow vigorously; foliage deep green; the tubers grow compactly in the hill, which is completely growled with fine large potatoes.	50	1.50	2.00
completely crowded with fine, large potatoes,	.50	1.50	3.00
Lady Fingers. The genuine old-fashioned New England			
baking variety,Lb. 20 cts. post-paid\$1.00 per Pk	\$3.	00 per	r Bu.

#### Pumpkin.

Chiefly used for agricultural purposes. Same cultivation as cucumbers and melons.

If sent by mail in quantities of one-half pounds and upwards, add eight cents

per pound for postage.	eigne	cents

cumber from which it derives its name. Very thick meated and	15	1.00
excellent for pies. One of the best,		1.00
Golden Oblong. Very fine,	.10	.75

#### Radish.

For early use sow in hot bed about the first of March, and for open air culture, sow as early in the spring as the ground can be worked and for a succession of every two weeks thereafter as long as required, in rich, warm sandy loam, in rows or drills six to eight inches apart, covering one-half inch deep. Thin the plants to two inches apart in the row. One ounce to 100 feet of drill.

	Pkt.	Oz.	₫lb.	Lb.
French Breakfast. A medium sized, oval shaped				
Radish of a very thick growth; very tender and				
crisp of a beautiful scarlet color,	.05	.15	.35	.80
Long Scarlet Short Top. The standard variety for				
market and private gardens,	.05	.10	.39	.75
White Tipped Scarlet Turnip. An early variety of				
medium size, crisp and tender,	.05	.10	.30	.75
Vick's Round Scarlet. Very fine and crisp when				
grown quick,	.05	.10	.25	.75
Strasburg. It is one of the best of the summer sorts				
roots long, handsome and tapering, and both skin				
and flesh pure white; flesh firm, brittle and tender,				
retaining these qualities even when roots have be-				
come old and large,	05	10	25	.80
White Pearl. One of the earliest and finest flavored	.00	.10	.00	.00
radishes we have ever had. From seed to table in				
18 days,	.05	.15	.30	1.00

#### Spinach.

Sow early in spring, in drills a foot apart, every two weeks for a succession and as it grows, thin out for use. For fall use, sow in August, and for winter crop, in September. Cover that which is left out over winter with straw or leaves, after the weather becomes quite cold. Keep clear of weeds.

One ounce to 100 feet of $drill$ .	*	Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Long Standing. Round thick leaved.	Dark green;				
the longest standing before running	to seed,	.05	.10	.15	.40

#### Salsify.

Salsify, or Vegetable Oyster, is considered by many a delicious vegetable, in fact, a great luxury, and is used for soups, also boiled, fried, etc., and possesses the flavor of the oyster, for which it is sometimes used as a substitute. The culture is the same as for Carrots and Parsnips, but it flourishes best with longest, smoothest roots, in a rather light or mellow soil that has been well pulverized to the depth of eighteen inches. Sow early in the spring in drills a foot or more apart, covering the seed not more than two inches in depth. Thin out to six inches apart. Put seed in the ground as early as possible in the spring. A portion of the crop may remain in the ground all winter, like the Parsnip.

	Pkt.	Oz.	ålb.	Lb.
Salsify, Sandwich Island.	.05	.15	.50	\$1.50

#### Squash.

Any good rich soil is adapted to the growth of the squash. They only thrive well in warm temperature, as all the varieties are tender annuals; and the seed should not be sown in spring until all danger from frost is past, and the ground is warm and thoroughly settled. The hills should be made from eight to ten inches in depth, manured well, and covered about three-

fourths of an inch deep. Keep the earth about the plants loose and clean, removing the surplus vines from time to time, allowing not more than three or four to a hill.

One ounce to fifty hills.

If sent by mail in quantities of one-half pound and upwards, add eight cents per pound for postage.

	Pkt.	Oz.	∄lb.	Lb.
Summer Crook-neck. Early, productive, and of				
good quality; fruit orange yellow,	.05	.15	.30	.80
Early Mammoth White Bush. The best early scal-				
loped summer sort,	.05	.15	.30	1.00
Boston Marrow. A much esteemed variety; a good				

keeper, and of unsurpassed flavor,  Early Prolific Marrow. For fall and winter use this	.05	.15	.30	1.00
is a very desirable sort. It is of excellent quality and keeps well,	.05	15	.30	1.00
tween the Hubbard and American Turban, having the color, shape, and fine quality of the Turban with the dryness and hard shell of the Hubbard.				
Flesh thick, fine-grained and solid. A good keeper. Very productive, early, and of rapid growth, <b>Hubbard.</b> A general favorite and more largely	.05	.15	.40	1.50
grown as a late sort, than any other, flesh fine grained, dry and excellent flavor,	.05	.15	.50	1.25
quality, good winter sort,	.05	.15	.50	1.50
and so very thin and smooth as to occasion little or no waste in baking. The flesh is solid, thick and of				
a bright orange color; dry, and it has a most rich and delicate flavor, quite distinct from other vari-				
eties. The squashes range in weight from eight to eleven pounds. The vines are vigorous, very				
productive and ripen the fruit evenly. In keeping qualities it excels all, remaining perfectly sound				
until the last of April,	.05	.15	.35	1.25
It varies in color and skin from green to orange, but uniform in shape. The flesh for sweetness and dryness, is unexcelled. There is no better variety				
for making squash pies,	.05	.15	.50	1.75

#### Tomato.

This is a native of South America. Nearly all our choice varieties are of recent origin. The seed should be sown thinly, about the first week in March, in a hot-bed, green-house or inside the window or sitting room, where the temperature is never below sixty degrees. When the plants are about two inches high, set out in boxes three inches deep, fout inches apat, in the same

temperature, or pot singly. If again transplanted before setting out, the plants will be still more stocky. Set out in the open ground about the first of June, four feet apart in each hill. Choose a sunny knoll and light sandy loam for early Tomatoes. If the vines are trained on a trellis, the fruit will be finer in every respect.

One ounce will produce over two thousand plants; two ounces will give plants enough for one acre.

	Pkt.	07	Lb.
Livingston's Perfection. Early, large, smooth and solid;	I IX U.	02.	120.
blood red color,	.05	.20	\$2.00

Ponderosa. This monster tomato, so largely advertised, is	.05	.20	2.00
described by the introducer as follows: "It is all solid meat, so free from seeds that we have had to pay our growers five times as much to raise seed of this as of the ordinary sorts." It is a very handsome variety, being uniformly large, smooth, and of a dark, rich crimson col-			
or and a delicious sub-acid flavor,	.10	.30	4.00
Cleveland's Advancer. Very early, and of very fine form. A rich red color and of medium size, exceedingly fine,	.10	.30	4.00

#### Turnip.

For early use, sow the small sorts as soon as the ground can be worked in the spring, in drills fourteen inches apart, the Ruta Bagas thirty inches. as the seed is very fine, it should be covered but slightly, excepting in very dry weather. Select light, if possible, new soil, and manure with plaster and ashes or phosphates. Should the young plants be troubled with insects, a sprinkling of the same will be found beneficial. Of the early varieties thin the plants to six inches apart, the Ruta Bagas to one foot. For fall and winter use, the early kinds should be sown from the middle of July to the middle of August, and the Ruta Bagas from the middle of June to the first of July, using from one to one and a half pounds of seed to the acre. Turnips are extensively used as winter feed for cattle and sheep. "Swede" and "Ruta Bagas" being synomymous terms, the names below, given as they are generally used, will be readily understood. The English varieties are almost exclusively used for early planting for market.

One ounce to 100 feet of drill.

	Pkt.	Oz.	Lb.

#### Pot, Sweet or Medicinal Herbs.

Every garden should contain some of the following varieties of herbs, both for culinary and medicinal purposes, as they are easily grown, and which preserved by drying, are ready for use at any season of the year. Care should be taken to harvest them properly. Cut just before they are in full bloom, on a dry day, and, after being thoroughly dried, they should be entirely excluded from the air. Sow in spring in shallow drills, covering lightly and when well up thin out or transplant to proper distance apart.

#### CON-AN-INE.

The greatest COW OIL obtainable in the world at a cost of only six cents per gallon—We guarantee CON-AN-INE to keep flies off from Horses and Cattle if used as directed.

CON-AN-INE is unsurpassed for general stable use—Cost only one tenth, what inferior articles cost.

Owners of Horses and Cattle cannot afford to be without it.

It is also a good disinfectant everywhere—about the house as well as the stable, it is put up in large bottles, and retails at \$1.00 each—and will make 16 gallons.

Death to mosquitoes.

#### SETH WYMAN FIFE, FRYEBURG, MAINE.

**READS TRIUMPH BARLEY,** is a distinct six-rowed variety with heads long and compact, each row closely set with unusually large, plump grains which are very weighty and usually over one hundred kernels to each head.
